

# **Process & Decision Documentation**

## **Project/Assignment Decisions**

During the side quest 1 when I found Github wasn't connecting with my code I assumed this is because the files were separate. When I merged the files I put my code in a folder in the repository folder. This decision caused my code to not appear and the website to have a 404 error. Once this issue was fixed my code reappeared and the site was operational.

### **GenAI Documentation**

No GenAI was used in this assignment.
